## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 43, drawn to an exciter system, classified in class 361, subclass 253.
- II. Claims 44 - 51, drawn to method of manufacturing, classified in class 313, subclass 135.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case

(a) the process as claimed can be used to make a materially different product such as the air bag control system,

(b) the product as claimed can be made by a materially different process such as high voltage potting.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. MPEP 8.21.02.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
